Amendment to Board Authorization to Purchase HYL-150 Unmanned Aircraft System

Background

At the regular Board meeting on July 20, 2026, the Board of Trustees authorized the General Manager to purchase one HYL-150 spray unmanned aircraft system package from Frontier Precision, Inc., in an amount not to exceed \$53,000.

Following Board approval, staff identified that the original quote and invoice for the drone did not include sales tax, and the \$53,000 not to exceed amount approved by the Board did not account for sales tax.

For out-of-state vendors that do not charge sales tax, the District must calculate a self-assessed tax based on the applicable Roseville sales tax rate. This self-assessed tax is considered a use tax.

The taxable purchase amount for the invoice is \$51,898. Applying the 7.75% tax rate results in a self-assessed use tax of \$4,022.10. With \$800 in shipping, the total purchase cost is \$56,720.10. Please see the attached invoice for reference.

Fiscal Impact

The total purchase cost, including the self-assessed use tax and shipping, is \$56,720.10.

Funding for the purchase is not budgeted and requires allocation of capital asset designated funds according to FY 2026-27 Budget amendment presented to the Board under Resolution 2026-20.

Because the total purchase cost exceeds the previously approved not to exceed amount of \$53,000, staff is requesting an increase in the authorization to an amount not to exceed \$60,000.

Staff Recommendation

Staff recommends:

- Board of Trustees approve amendment of July 20, 2026, authorization for the purchase of one HYL-150 Spray Unmanned Aircraft System package from Frontier Precision, Inc., increasing the authorized amount from \$53,000 to an amount not to exceed \$60,000.
- Allocate the final purchase amount not to exceed \$60,000 from OT-91007 – Capital Assets (30210) to SC-5210 – Vehicles, All Types (54450) for the purchase of the HYL-150 Spray Unmanned Aircraft System.

RESOLUTION NO. 2026-20

**A RESOLUTION OF THE BOARD OF TRUSTEES
OF THE PLACER MOSQUITO AND VECTOR CONTROL DISTRICT
AMENDING THE DISTRICT BUDGET FOR FISCAL YEAR 2026-27**

WHEREAS, The Board of Trustees (the "Board") of the Placer Mosquito and Vector Control District (the "District") County of Placer, State of California, have reviewed the budget and desire to amend the approved final District Budget, and

NOW, THEREFORE BE IT RESOLVED as follows:

1) Amend the District Budget for Fiscal Year 2026-27 by making the following adjustment:

A. \$56,721 from OT-91007-Capital Assets (30210) to PG700000 SC-5210-Vehicles, All Types (54450).

PASSED AND ADOPTED by the Board of Trustees of the Placer Mosquito and Vector Control District on the 17th day of August 2026 by the following vote:

AYES: Ø
NOES: Ø
ABSTAIN: Ø
ABSENT: Ø

Attest:

Sandy Bendorf, Board President

Isabel Alvarez, Board Secretary

Truckee Field Station Report

August 2026

Field Station Manager: Angella Falco

Mosquito Surveillance

- Weekly trap counts were extremely low in July, compared to the three-year average. (Figure 1 wk. 28)
- *Aedes sierrensis* (Western treehole mosquito) numbers are dropping rapidly. Current trap numbers are about half of July numbers.

Figure 1. three year moving average of weekly mosquito trap counts for prior three years represented by green bars. Red line= *Cx. tarsalis* totals, blue line = *Ae. sierrensis* totals, grey line = all other species.

Vector-borne Disease Testing

All *Culex* mosquitoes collected in the Tahoe Basin are submitted to the Roseville lab for disease testing (WNV, SLE, WEE). To date, no pools collected from this area have ever tested positive.

Yellowjacket Surveillance

Two traps are deployed at seven different sites, one containing canned chicken as bait, the other with heptyl butyrate.

- Despite a very slow start to the year and with extremely low weekly trap numbers, yellowjacket numbers are now beginning their exponential climb (Figure 2).

Figure 2. Total number of yellowjackets collected in all traps per week, 2024-2026.

Miscellaneous

Madison Smith has just completed her third year as a seasonal in the Truckee office. Madi has proven to be a quick learner and an extremely hard worker and has made valuable suggestions that have helped improve data collection. She was also involved in helping train this year's volunteers. It has been a pleasure to work with Madi and having a seasonal employee return for three years has been invaluable. She has been a real asset to the Truckee office and will be missed. Best wishes Madi!

Madi graduated from UC Davis with her bachelor's degree in chemistry, and is now headed to Eugene, Oregon to pursue her PhD.

Figure 3. Madison Smith has just completed her third year as a seasonal in the Truckee office.

PUBLIC INFORMATION AND OUTREACH REPORT

Reporting period: July-August 2026

Prepared by: Emma Carlson, Public Information Officer

June-July Highlights

Community Events & Outreach

- **Healthy Families Fitness Festival:** We joined over 50 community vendors at this event hosted by the Sierra Community Medical Foundation. Our booth had over 450 visitors, where we shared information, encouraged District email notification signups, and showed off our hissing cockroaches to insect-curious attendees.
- **Placer Association of Realtors Meeting:** Joel was the guest speaker at the Rocklin Marketing Meeting, where he gave an overview of the District's operations, specifically speaking on the residential development in Placer County.
- **National Night Out:** We joined the national effort to enhance relationships between neighbors and community organizations at Blue Oaks Park in Roseville. Here, we spread the word about mosquito control activities and networked with other partners such as City of Roseville Fire and Police Departments.
- **Dry Creek Conservancy Salmon Mural:** We supported this community project in Royer Park in Roseville. Efforts to promote healthy flowing rivers and creeks are essential to preventing standing water and mosquito breeding habitats.
- **Loomis Library Bug Bonanza:** We partnered with the Loomis Library to bring a bug-inspired presentation with interactive games and activities. The event saw over 60 attendees, and the Loomis Library agreed to partner more throughout the school year on insect education activities.
- **Upcoming:**
 - **Tri-County Home and Garden Show** (8/14-8/15)
 - **Kidzapalooza** (9/10)
 - **Hot Chili Cool Cars** (9/19)
 - **Placer Nature Center Open House** (9/26)
 - **Loomis Fruitshed Festival** (10/4)

Campaigns & Awareness

- **Clear Channel Billboard Campaign:** Active billboards until the end of August.
- **SMS-Texting Notifications:** We completed onboarding with Ascendant App, so we are now equipped to start SMS alerts. This will be used as a pilot project for our 2026 invasives campaign, both for parcel inspections and invasive findings.

Public Engagement & Press

- **KFBK Interview:** Joel was interviewed on the Pat Walsh show on 7/30. The interview recording is available across our social media channels, and topics covered include mosquito prevention tips, West Nile virus (WNV) risk, and District surveillance and control operations.
- **Telemundo Interview:** Isabel had the opportunity to speak with an Entravision reporter for an evening news segment that aired on July 23. The interview focused on West Nile virus detection and mosquito prevention tips for community members. We also strategically incorporated messaging about property inspections to increase public awareness and familiarity with our door-to-door outreach efforts and inspection practices.
- **Press Release for Increased WNV Activity in West Roseville:** On 7/22, we released a public notice notifying residents of increased WNV risk after more mosquito samples tested positive in Roseville.

Digital Outreach

Service Spotlight Series: Video series highlighting various service request-related activities. The goal was to educate and inform residents about our services while encouraging them to report mosquito issues to the District. The series coincides with our neighborhood invasive door-to-door efforts, helping increase public familiarity with our technicians and the work they perform in the community.

- How to submit a service request
- Yard Inspections
- Larvae Extraction
- Mosquitofish Inspection and Placement

Lunch at the Library (LATL) with City of Roseville Series: One of the activities for attendees of our three LATL events was an insect coloring station. Kids had the opportunity to submit a drawing of their favorite insect for the chance to be a featured artist on our social media channels. We shared the featured artists and insect fun facts throughout the summer, which also helped market our upcoming outreach events. We went from 60 attendees at our first LATL to over 90 attendees at our final LATL.

Video: New Uniforms

Hey Placer County! Check out Placer Mosquito's new fit! 🟢
Our technicians are rocking new uniforms this summer ☀️
Whether they're at the office or out on the road keeping our county protected, they're doing their jobs in style 😎
Same District, different look!

Video: Insect Repellent Reminder

Hey Placer County! With more mosquito samples testing positive for West Nile virus in the area, it's more important than ever to wear your EPA-registered mosquito repellent 🦟
Mosquito repellent is available in many forms. Look for active ingredients like DEET, picaridin, and oil of lemon eucalyptus. Always read and follow the label instructions for safe and effective use.
Don't forget these other ways to help prevent mosquito bites:
✓ Wear long sleeves
✓ Keep windows and doors closed
✓ Make sure window and door screens are in good repair
Protect yourself and stay safe this summer 🍷

KFBK
NEWS RADIO
SACRAMENTO • 93.1FM • 1530AM

Audio Recording: KFBK Interview

🔔 ICYMI: Our General Manager, Joel Buettner, joined KFBK last week to talk all things mosquitoes! 🗣️ 🦟
With mosquitoes in Placer County recently testing positive for West Nile virus (WNV), it's more important than ever to stay informed and take simple steps to prevent mosquito bites and reduce breeding sites. Here are a few key takeaways from the conversation: ⬇️
👉 Right now is the highest-risk time to be bitten by a mosquito carrying WNV.
👉 Placer Mosquito is on it: trapping, testing, and treating mosquitoes to help protect our community.
👉 Awareness is the first step in preventing mosquito-borne disease.
👉 Protect yourself: Wear long sleeves and pants, use an EPA-registered insect repellent, and DUMP & DRAIN standing water around your home to stop mosquitoes from reproducing.

Field Operations and Surveillance Report

Prepared August 11, 2026

Deputy General Manager: Jake Hartle

Supervisors: Cassey Hubble, Mike Ashley and Scott Schon

Mosquito Surveillance & Vector-borne Disease Testing

Adult Mosquito Abundance:

- *Culex pipiens* and *Culex tarsalis* are two of several species in the *Culex* genus that act as primary vectors for West Nile virus, St. Louis encephalitis, and Western equine encephalitis.
- *Culex tarsalis* and *Culex pipiens* abundance increased substantially and remained generally above the three-year average through Week 32 (August 2-8). The most recent collections show a decline in both species during Week 33 (August 9-15), with *Culex tarsalis* falling below the three-year average and *Culex pipiens* remaining above it (Figures 1 and 2).

Figure 1: *Culex tarsalis* adult mosquito count per trap night (red line), compared to the three-year average (green bars) by calendar weeks (Week 33 represents August 9-15)

Figure 2: *Culex pipiens* adult mosquito count per trap night (purple line), compared to the three-year average (green bars) by calendar weeks (Week 33 represents August 9-15)

Vector-borne Disease Testing:

- The majority of West Nile virus-positive mosquito detections are concentrated in rural western Placer County, particularly in the agricultural areas west of Lincoln and Roseville. Additional positives have been detected within and around the City of Lincoln and in western Roseville, with relatively few detections occurring farther east.

Positive Detections for 2026 Year to Date (January 1 - August 07)			
	WNV	SLE	WEE
Mosquito Samples	65/2130 3.0%	0	0
Dead Birds	4/71 5.6%	0	0

Invasive Aedes Surveillance:

- In July, we collected an above average amount of *Aedes aegypti* mosquitoes. So far this year, 39 neighborhoods are active. Ten truck adulticide and larvicide applications have been completed to reduce *Aedes aegypti* populations. We have developed ten parcel inspection plans covering 197 properties, and we successfully inspected 96 of them.

Field Operations

Basin Aviation Aerial Larvicide Applications:

- Mosquito larvicide treatments for organic rice fields are scheduled to stop on August 19 and August 25 for conventional rice fields.
- Treated 14,820 conventional acres of rice in July.
- Treated 9,032 organic acres of rice in July.

VDCI Aviation Aerial Adulticide Applications:

- We have completed six aerial mosquito adulticide missions in response to high adult mosquito abundance and positive WNV mosquito samples. The areas included Sheridan, Elverta, Amoruso and rural agricultural areas in West Placer. Over 60,000 acres were treated as a result of these applications.

Placer MVCD Ground Larvicide and Adulticide Applications:

- In July we made 19 ground ULV mosquito adulticide missions treating 3,799 acres.
- In July we made 10 ground mosquito larvicide missions treating 2,129 acres.

Unmanned Aircraft Systems (UAS) Applications:

- 11 missions totaling 19 flights in July 2026
 - 2 UAS test flight missions
 - 3 Training missions
 - 4 Habitat assessment missions
 - 2 Aerial mosquito adulticide missions
- First ULV UAS mosquito adulticide treatment
 - The District's first aerial mosquito adulticide mission took place on July 23. The treatment focused on rice fields and a riparian area in rural Placer County west of Roseville, treating more than 250 acres.
 - Valuable information was gained from data collected during the first and ultimately the second UAS adulticide mission that took place the following week. A third application is scheduled for August 13.
 - These applications will help us better understand the UAS application cloud dynamics including calculating drone offsets, effective swath width, and ultimately the efficacy of UAS mosquito adulticide missions.

Mosquito Source Work for May - July 2026:

Mosquito Source Work: May - July 2026	May	June	July
Total Pesticide Applications (including catch basins)	422	1436	1708

Weights given with the assumption of 450 adult fish per pound.			
Report Date	Current Year	Prior Year	
31 Jul 2026	2026	2025	

Miscellaneous

Culex tarsalis Colony:

- The *Culex tarsalis* colony has experienced increased mortality during the 4th instar and pupal stage. In mid-July, a blue mosquito was observed. Although the underlying cause was not identified, this finding suggested continued deterioration of the colony. Based on these observations, the decision was made to terminate the colony.
- All items associated with the colony have been scrubbed, sterilized, and in some instances replaced. The room itself has been cleaned, disinfected and restocked.
- A new shipment of eggs of the same *Cx. tarsalis* strain has been received from the CDC and we are in the process of repopulating our colony.

Vectech: Scout Trap

- In partnership with Vectech, the District has received a Scout smart mosquito trap for testing. The trap allows users to remotely monitor mosquito species that are entering the trap, reducing the need to visit the site, retrieve the collection bag, and identify specimens in the laboratory. In collaboration with Vectech, District staff will begin training the identification software and evaluating the trap's performance.

Water Line Leak:

- An underground waterline leak was detected in the front parking lot near the wash bay. The line is separate from the main building and was able to be shut off. The leaking line is scheduled to be fixed on August 12.

General Manager's Report

Joel Buettner, General Manager

08/13/2026

MapVision Transition

As reported previously, the current owner of the District's field data system, Central Life Sciences, and a third-party software development and support company, Orion, have been signaling that support for MapVision will soon end. This is due to the decision announced in mid-June by Central to drop their UAS, MapVision, and Drop Vision product lines. For the District, the concern is for short term continuity of support for MapVision, since this is our core data collection, reporting, mapping, and regulatory compliance system for all District operations. Initially there was lack of clarity as to what actually was going to happen to MapVision, but over the past weeks, have been told that Central will be continuing to support MapVision through October 2026. At that point, Central will provide the District's MapVision Code to the District. Orion, which has been supporting MapVision for several years, as a subcontractor for Central, will be offering on-going MapVision support and hosting beyond October 2026. The main concerns of the District are that we maintain continuity of service through the current mosquito season at minimum, then long enough to evaluate options to continue with MapVision with Orion, or seek other solutions.

At this point, the plan is to review proposed contracts and scopes of work from Orion with district counsel, and bring a proposed contract for continuing MapVision support provided by Orion to the Board later this fall.

Administrative and Operations Procedure Manual

The purpose of this manual is to capture current processes, maintain internal control systems, and meet regulatory requirements and best practices. The first round of staff review of the manual is nearing completion. Next will be implementation of select parts of the manual including training staff and updating workflows.

Remote Sensing to Inform Rice Field Larviciding Project

PMVCD and AG-Genius continue developing a Larval Habitat Risk Index and degree-day model using satellite, hyperspectral, and thermal data to help prioritize rice-field inspections and larviciding. Initial plans to use hyperspectral drone-based imaging to test signals received from open water have been completed at another site, so plans to fly in Placer County have been postponed until next season.

Upcoming Events

- AMCA Interim Board Meeting – Nov 5-6, 2026 – Denver, CO
- MVCAC Annual Conference – January 24-25, 2027 – Universal City, CA
- AMCA Annual Conference – March 3-5, 2027 – St. Louis, MO
